HEALTH HAZARD INFORMATION

HEALTH EFFECTS

ACUTE

SWALLOWED: Considered an unlikely route of entry in commercial/industrial environments. The liquid is discomforting to the gastro-intestinal tract. Ingestion may result in nausea, abdominal irritation, pain and vomiting.

EYE: The mist is highly discomforting to the eyes. Not considered an irritant through normal use.

SKIN: The material may be discomforting to the skin if exposure is prolonged or from repeated exposures over long periods. Not considered an irritant through normal use.

INHALED: The mist is discomforting to the upper respiratory tract. Not considered an irritant through normal use.

WARNING: Intentional misuse by concentrating/inhaling contents maybe lethal. As with any chemical, ingestion, inhalation, and prolonged or repeated skin contact should be avoided by good occupational work practice.

CHRONIC

Principal routes of exposure are usually by skin contact and inhalation of spray mist/vapour.

Warning: Aerosol containers may present pressure related hazards.
