## Section 2: Hazards Identification

|                         |                                                                                                                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Classification          | This substance is not classified as a dangerous good according to NZS5433: 2007<br>This substance is hazardous according to the <i>HSNO (Minimum Degrees of Hazard) Regulations 2001</i><br>HSNO Approval Number: HSR002530 – Cleaning Products (Subsidiary Hazard) Group Standard 2006 |
| Precautionary Statement | Read the label before use. Avoid release to the environment. Wear eye protection when refilling dispensers.                                                                                                                                                                             |

| HSNO Classification                                                                         | GHS Category | Signal Word | Hazard Code | Hazard Statement               |
|---------------------------------------------------------------------------------------------|--------------|-------------|-------------|--------------------------------|
| 6.4A<br> | Eye irritant | Warning     | H319        | Causes serious eye irritation. |

| Prevention Code | Prevention Statement                  |
|-----------------|---------------------------------------|
| P102            | Keep out of the reach of children.    |
| P103            | Read Label before use.                |
| P233            | Keep container tightly closed.        |
| P264            | Wash hands thoroughly after handling. |
| P280            | Wear protective clothing.             |

| Response Code    | Response Statement                                                                                                                 |
|------------------|------------------------------------------------------------------------------------------------------------------------------------|
| P101             | If medical advice is needed, have product container or label at hand.                                                              |
| P330             | Rinse mouth.                                                                                                                       |
| P301 + P312      | IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell                                                          |
| P305 + P351+P338 | IF IN EYES: Rinse cautiously with water for several minutes.<br>Remove contact lenses, if present and easy to do. Continue rinsing |
| P332 + P313      | If skin irritation occurs: Get medical advice/ attention.                                                                          |
| P337 + P313      | If eye irritation persists: Get medical advice/attention                                                                           |

| Storage Code | Storage Statement                            |
|--------------|----------------------------------------------|
| P403 + P235  | Store in a well-ventilated place. Keep cool. |

| Disposal Code | Disposal Statement                                                                                                                                                                                                            |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P501          | Avoid release to the environment. Dilute contents before disposing. Triple rinse container with water before disposing. If not practicable, crush or puncture the container and dispose in domestic or trade waste container. |

## Section 3: Composition / Information on Ingredients

| Ingredients   | Wt%    | CAS Number |
|---------------|--------|------------|
| Surfactants   | 20-30% | Mixture    |
| Citric Acid   | <1%    | 77-92-9    |
| Preservatives | <1%    | Mixture    |

## Section 4: First Aid Measures

### Recommended on site emergency facilities:

Ready access to running water is required. Accessible eyewash station is required. Emergency Ready access to shower, hand wash.

|              |                                                                                                                                                                                                               |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye Contact  | Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center or doctor/physician.                                    |
| Skin Contact | If skin irritation or rash occurs cease use.                                                                                                                                                                  |
| Ingestion    | Rinse mouth. Drink 1-2 glasses water.                                                                                                                                                                         |
| General      | In case of adverse health effects, seek medical advice. If medical advice is needed, have product container or label at hand. If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician. |

## Section 5: Fire Fighting Measures

|                                                              |                                                                                                                                         |
|--------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Hazard Type                                                  | Non flammable or combustible.                                                                                                           |
| Hazards from decomposition products                          | Fumes may be serious eye irritants.                                                                                                     |
| Suitable Extinguishing media                                 | All firefighting media. Water, foam, CO2, or chemical dry powder to extinguish a local fire. Water spray on large fires only.           |
| Precautions for firefighters and special protective clothing | Standard fire-fighting procedures may be followed, Firefighters wear SCBA and chemical resistant suits. including full protective gear. |
| HAZCHEM CODE                                                 | None Allocated                                                                                                                          |

## Section 6: Accidental Release Measures

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Protective Clothing Requirements | Wear protective gloves/eye protection/face protection.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Land Spill or Leaks:             | <p><b>Small spills</b> – Prevent by whatever means possible any spillage from entering drains, sewers, or water courses. (If this occurs contact your regional council immediately). Clear area of unprotected personnel. Spills on floors will produce a slippery surface. Shut off, or isolate, all possible sources of ignition. Do not allow any spills, original or diluted, to enter wastewater drains. If material does enter, alert the local drainage authorities. Contain minor (less than 100 litres) from local drainage with any suitable bund or barrier. Where possible dilute with water and contain the resulting solution. Then clean up with mops or any suitable absorbant inert material such as Mineral Sponge, paper, rags, sand or soil. Pack absorbed waste material into drums, which can be closed, for waste disposal.</p> <p><b>Large spills</b> – bund or dyke to prevent run-off. Large spills from drums should be contained from drains and diluted with water where possible. Alert the local Fire Brigade. Collect absorbed material in open-top drums which can be closed and sent to landfill.</p> <p>Dispose of only in accord with all regulations.</p> |

## Section 7: Handling and Storage

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Approved Handlers:             | When present in quantities greater than <b>250 L</b> (when in containers greater than <b>5 L</b> ) or <b>500 L</b> (when in containers up to and including <b>5 L</b> ), a HSNO 3.1B substance must be—<br>(a) under the personal control of an approved handler who holds a current test certificate to manage HSNO class 3 substances; or<br>(b) secured so that a person cannot gain access to the substance without tools, keys, or any other device used for operating locks.<br>A substance may be handled by a person who is not an approved handler if—<br>(a) the approved handler has provided guidance to the person in respect of the handling; and<br>(b) the approved handler is available at all times to provide assistance, if necessary, to the person while the substance is being handled by the person. |
| Precautions for safe handling: | Keep out of reach of children.<br>Do not breathe dust/fume/gas/mist/ vapours/spray.<br>Avoid breathing dust/fume/gas/mist/ vapours/spray.<br>Wash hands thoroughly after handling.<br>Do not eat, drink or smoke when using this product.<br>Avoid release to the environment.<br>Wear protective gloves/protective clothing/eye protection/face protection.<br>In case of inadequate ventilation wear respiratory protection.<br>Read the label before use. Avoid release to the environment. Wear eye protection when refilling dispensers                                                                                                                                                                                                                                                                                 |
| Conditions for safe storage:   | Advisable to segregate from food and feedstuffs<br>Keep out of direct sunlight<br>Store in a locked up, well-ventilated place. Keep cool.<br>Store drums and carboys with secure closures . Store in a well-ventilated place. Keep cool. Keep away from heat                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

# SAFETY DATA SHEET

Issue date : 7/9/2020, According to 91/155

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | and ignition sources. Storage in HSNO defined Hazardous Substance Locations and Transit Depots is required for Class 3.1B products where greater than 100 litres is stored in 20 litre carboys and 200 litre drums, and greater than 250 litres is stored in 5 litre jerries. Handle to prevent damage to containers. Should packaging be damaged, repack into clean and dry containers of the same type and mark the product name carefully on the container. Always replace lids and caps after using the product. Return all packages to safe storage as soon as possible after use. |

## Section 8: Exposure Controls / Personal Protection

|                               |                                                                                                                                                                                                                                                                                                                |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Engineering Controls          | Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation. Ethanol: WES TWA 1000 ppm.. |
| Personal Protective Equipment | Wear PVC Apron. protective gloves/eye protection/face protection.                                                                                                                                                                                                                                              |
| Household setting             | No special precautions necessary as long as product is used as directed.                                                                                                                                                                                                                                       |
| Industrial Setting            |                                                                                                                                                                                                                                                                                                                |
| Respiratory Protection        | Approved respirator for organic vapours when vapor or mist may be generated.                                                                                                                                                                                                                                   |
| Eye Protection                | Goggles or other protective eye wear may be worn for protection                                                                                                                                                                                                                                                |
| Skin Protection               | Gloves may be worn for protection                                                                                                                                                                                                                                                                              |
| Hygiene Measures              | Handle in accordance with good industrial hygiene and safety practice.                                                                                                                                                                                                                                         |

## Section 9: Physical and Chemical Properties

|                |                          |
|----------------|--------------------------|
| Physical State | Liquid                   |
| Colour         | Clear to cloudy          |
| Clarity        | No data available        |
| Odour          | Slight nondescript smell |

|                                         |                   |
|-----------------------------------------|-------------------|
| pH                                      | Approx 6.0 - 7.0  |
| Melting Point                           | No data available |
| Freezing Point                          | No data available |
| Initial Boiling Point and Boiling Range | Approx. >100°     |
| Flash Point                             | Non flammable     |

|                   |                   |
|-------------------|-------------------|
| Solubility        | Soluble in water  |
| Specific Gravity: | Approx. 1.0       |
| Vapour Pressure   | No data available |
| Evaporation Rate  | No data available |
| Viscosity         | No data available |

## Section 10: Stability and Reactivity

|                                  |                                                                                                                                    |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity                       | The product is considered stable in normal use.                                                                                    |
| Chemical Stability               | Stable under normal conditions                                                                                                     |
| Conditions to Avoid              | None.                                                                                                                              |
| Incompatibility                  | In general, cleaning products should not be mixed with other chemicals, or unless specifically provided for in the use directions. |
| Hazardous Decomposition Products | None.                                                                                                                              |

## Section 11: Toxicological Information

|                                    |                                                                                                                                                                                                                                                                                                                                                                                         |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General toxicological information: | No specific data is available for this product. Toxicological data has been evaluated/calculated for the mixture. The product is considered to have the following potential health effects. The evaluation of the product is based on data from the raw material and/or comparable substances. Symptoms or effects that may arise if the product is mishandled and overexposure occurs. |
| Potential Route(s) of Exposure     | Eyes. Skin. Ingestion. Inhalation                                                                                                                                                                                                                                                                                                                                                       |
| Effects of Acute Exposure          |                                                                                                                                                                                                                                                                                                                                                                                         |
| Acute Oral Toxicity:               | Calculations for the mixture comes out at >5000 mg/kg hence no classification required.                                                                                                                                                                                                                                                                                                 |
| Acute Dermal Toxicity:             | Calculations for the mixture comes out at >5000 mg/kg hence no classification required.                                                                                                                                                                                                                                                                                                 |
| Inhalation                         | No Data, May irritate the respiratory tract. May result in nausea, headache and vomiting.                                                                                                                                                                                                                                                                                               |
| Ingestion:                         | No Data, Large amounts may cause some central nervous system effects. Possible symptoms include excitation, euphoria, headache, dizziness, drowsiness, blurred vision, loss of consciousness. Other effects may include nausea, vomiting, diarrhea, abdominal pain and chemical burns to the gastrointestinal tract.                                                                    |
| Eye Contact:                       | Contamination of eyes may result in injury.                                                                                                                                                                                                                                                                                                                                             |
| Skin Contact:                      | Contact with skin will result in mild irritation.                                                                                                                                                                                                                                                                                                                                       |

# SAFETY DATA SHEET

Issue date : 7/9/2020, According to 91/155

|                        |                                                             |
|------------------------|-------------------------------------------------------------|
| Sensitization:         | No data available.                                          |
| In vitro mutagenicity: | No data available.                                          |
| Chronic Effects        | Not available. Not expected to have chronic health effects. |
| Toxicity Method:       | Calculation.                                                |

## Section 12: Ecological Information

|                                 |                                                                                                                                                                                                                           |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General ecological information: | The ecological evaluation of the product is based on data from the raw material and/or comparable substances.                                                                                                             |
|                                 | General notes: <ul style="list-style-type: none"> <li>Do not allow undiluted product or large quantities of it to reach groundwater, water bodies or sewage systems.</li> <li>Avoid release to the environment</li> </ul> |
| Environmental Precautions:      | Avoid release to the environment                                                                                                                                                                                          |
| Environmental Fate:             | Will degrade by bacteriological action in soil and water.                                                                                                                                                                 |
| Environmental Exposure Limits:  | None set                                                                                                                                                                                                                  |

## Section 13: Disposal Considerations

|                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Waste   | Any disposal must be in compliance with New Zealand laws and regulations., Incineration is the preferred method.                                                                                                                                                                                                                                                                                                                                                                                                      |
| Considerations  | A substance must be disposed of by: <ol style="list-style-type: none"> <li>exporting the substance from New Zealand as waste; or</li> <li>treating the substance so that it is no longer a hazardous substance.</li> <li>Avoid release to the environment. Dilute contents 5:1 before disposing. Triple rinse containers before re-use or disposal. If bulk containers are not to be reused, crush or puncture so they cannot contain any other liquid. Safe to discard as domestic or commercial rubbish.</li> </ol> |
| Empty Packaging | Remove label if applicable and offer empty containers for recycling.<br>Recycle wherever possible or consult manufacturer for recycling options.                                                                                                                                                                                                                                                                                                                                                                      |

## Section 14: Transport Information

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NZ Land Transport Rule | Classified as a hazardous substance according to the HSNO Classification Regulations 2001 – Subsidiary Hazard (6.4A Eye irritant).                                                                                                                                                                                                                                                                                  |
| UN Number:             |                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Marine Pollutant       | NO                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Transport Notes:       | Tank wagons and transportable containers of any capacity used to carry a substance must comply with the Hazardous Substances (Tank Wagons and Transportable Containers) Regulations 2004.<br>When a substance is carried on a passenger service vehicle, the substance must— <ol style="list-style-type: none"> <li>be packaged in a sealed container; and</li> <li>not exceed <b>2.5 L</b> per package.</li> </ol> |
